**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

### **DETAILED ACTION**

1. In the preliminary amendment filed February 8, 2005, claims 35-44 and 50-55 have been cancelled. Therefore, claims 1-34 and 45-49 are pending.
2. Claim 45 is improper dependent claim because it depends from a cancelled claim, claim 44. Appropriate correction is required.

### ***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Claims 1-34 and 45-49, drawn to a method of controlling the secretions from glands selected from the group consisting of holocrine glands, and the holocrine-like components of crumen and mammal glands in patients whose level of glandular secretion is greater than is desirable by administering to said patient a secretorily controlling amount of botullnum toxin.

This application contains claims directed to the following patentably distinct sub-genera of the claimed invention: holocrine glands, and the holocrine-like components of cerumen and mammal glands (claim 1). Each sub-genus is functionally divergent and would require separate non-overlapping searches.

In addition, this application contains claims directed to the following patentably distinct species of the claimed invention: sebaceous glands, pilosebaceous glands,

Art Unit: 1656

meibomium glands, and glands of Zeiss and Moll (claim 2). Each species is functionally divergent and would require separate non-overlapping searches.

Additionally, this application contains claims directed to the following patentably distinct species of the claimed invention: seborrheic dermatitis, rhinophyma, seborrheic blepharitis, sebaceous cysts, excess cerumen, unwanted milk production, and bacterial infections of these glands resulting in hidradenitis, furuncles, carbuncles, styes and chalazions (claim 3). Each species is functionally divergent and would require separate non-overlapping searches.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed sub-genus and a species therefrom for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1, 2 or 3 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1656

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathleen Kerr can be reached at 571-272-0931. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
